PERSONAL PROJECTS

Electronic Currency Platform (09/2024 - 10/2024)
- Developed a modern web application for buying and selling electronic stocks, featuring a fully responsive design, seamless user experience, and secure transactions powered by the Transaction Cloud API. Optimized performance and enhanced security for reliable financial operations.
- Code Link
- Demo

Food Management (11/2023 - 12/2023)
- Developed 'Food For All,' a web platform connecting donors and recipients to reduce food waste and combat hunger. Built using Next.js, Tailwind CSS, Clerk for authentication, and Mongoose for efficient database management. Ensured a seamless user experience with a responsive design and secure data handling.
- Code link

Jugnu Music (05/2021 - 07/2024)
- Developed a Open Source Discord bot with Handle Upto 5000+ users, featuring buttons, premium filters, sleek UI, and dedicated bot channel support. Optimized query time by 40% using Distube.JS, Discord.JS, Express.js, and Josh wrapper for SQL and Mongoose.
- Code Link
- Dashboard Link

Saint (11/2024 - 03/2025)
- Built a customizable profile card platform with Next.js, real-time analytics, social integrations, premium subscriptions, and responsive animated UI.
